

Honey Production 1992 vs 2020

Honey production is getting worse: Is it the truth, or just a rumor?

15 out 50 states are
in a very bad condition!!!

Honey is the best sugar for sweet tea.
It not only has a good flavor but provides healthy nutrition for humans.
However, some people say that
honey production is getting worse because of honey bee colonies lost, climate changes, etc.
I was born in 1992, so I want to know if the honey production has truly decreased,
Or it is just happening in very few places, and even it is just a rumor that deceives people.

16 out 50 states are
getting worse!
